

Flow control statements

Conditionals & loops

•Statement 1

•Statement 2

•Statement 3

•Statement 4

Conditionals

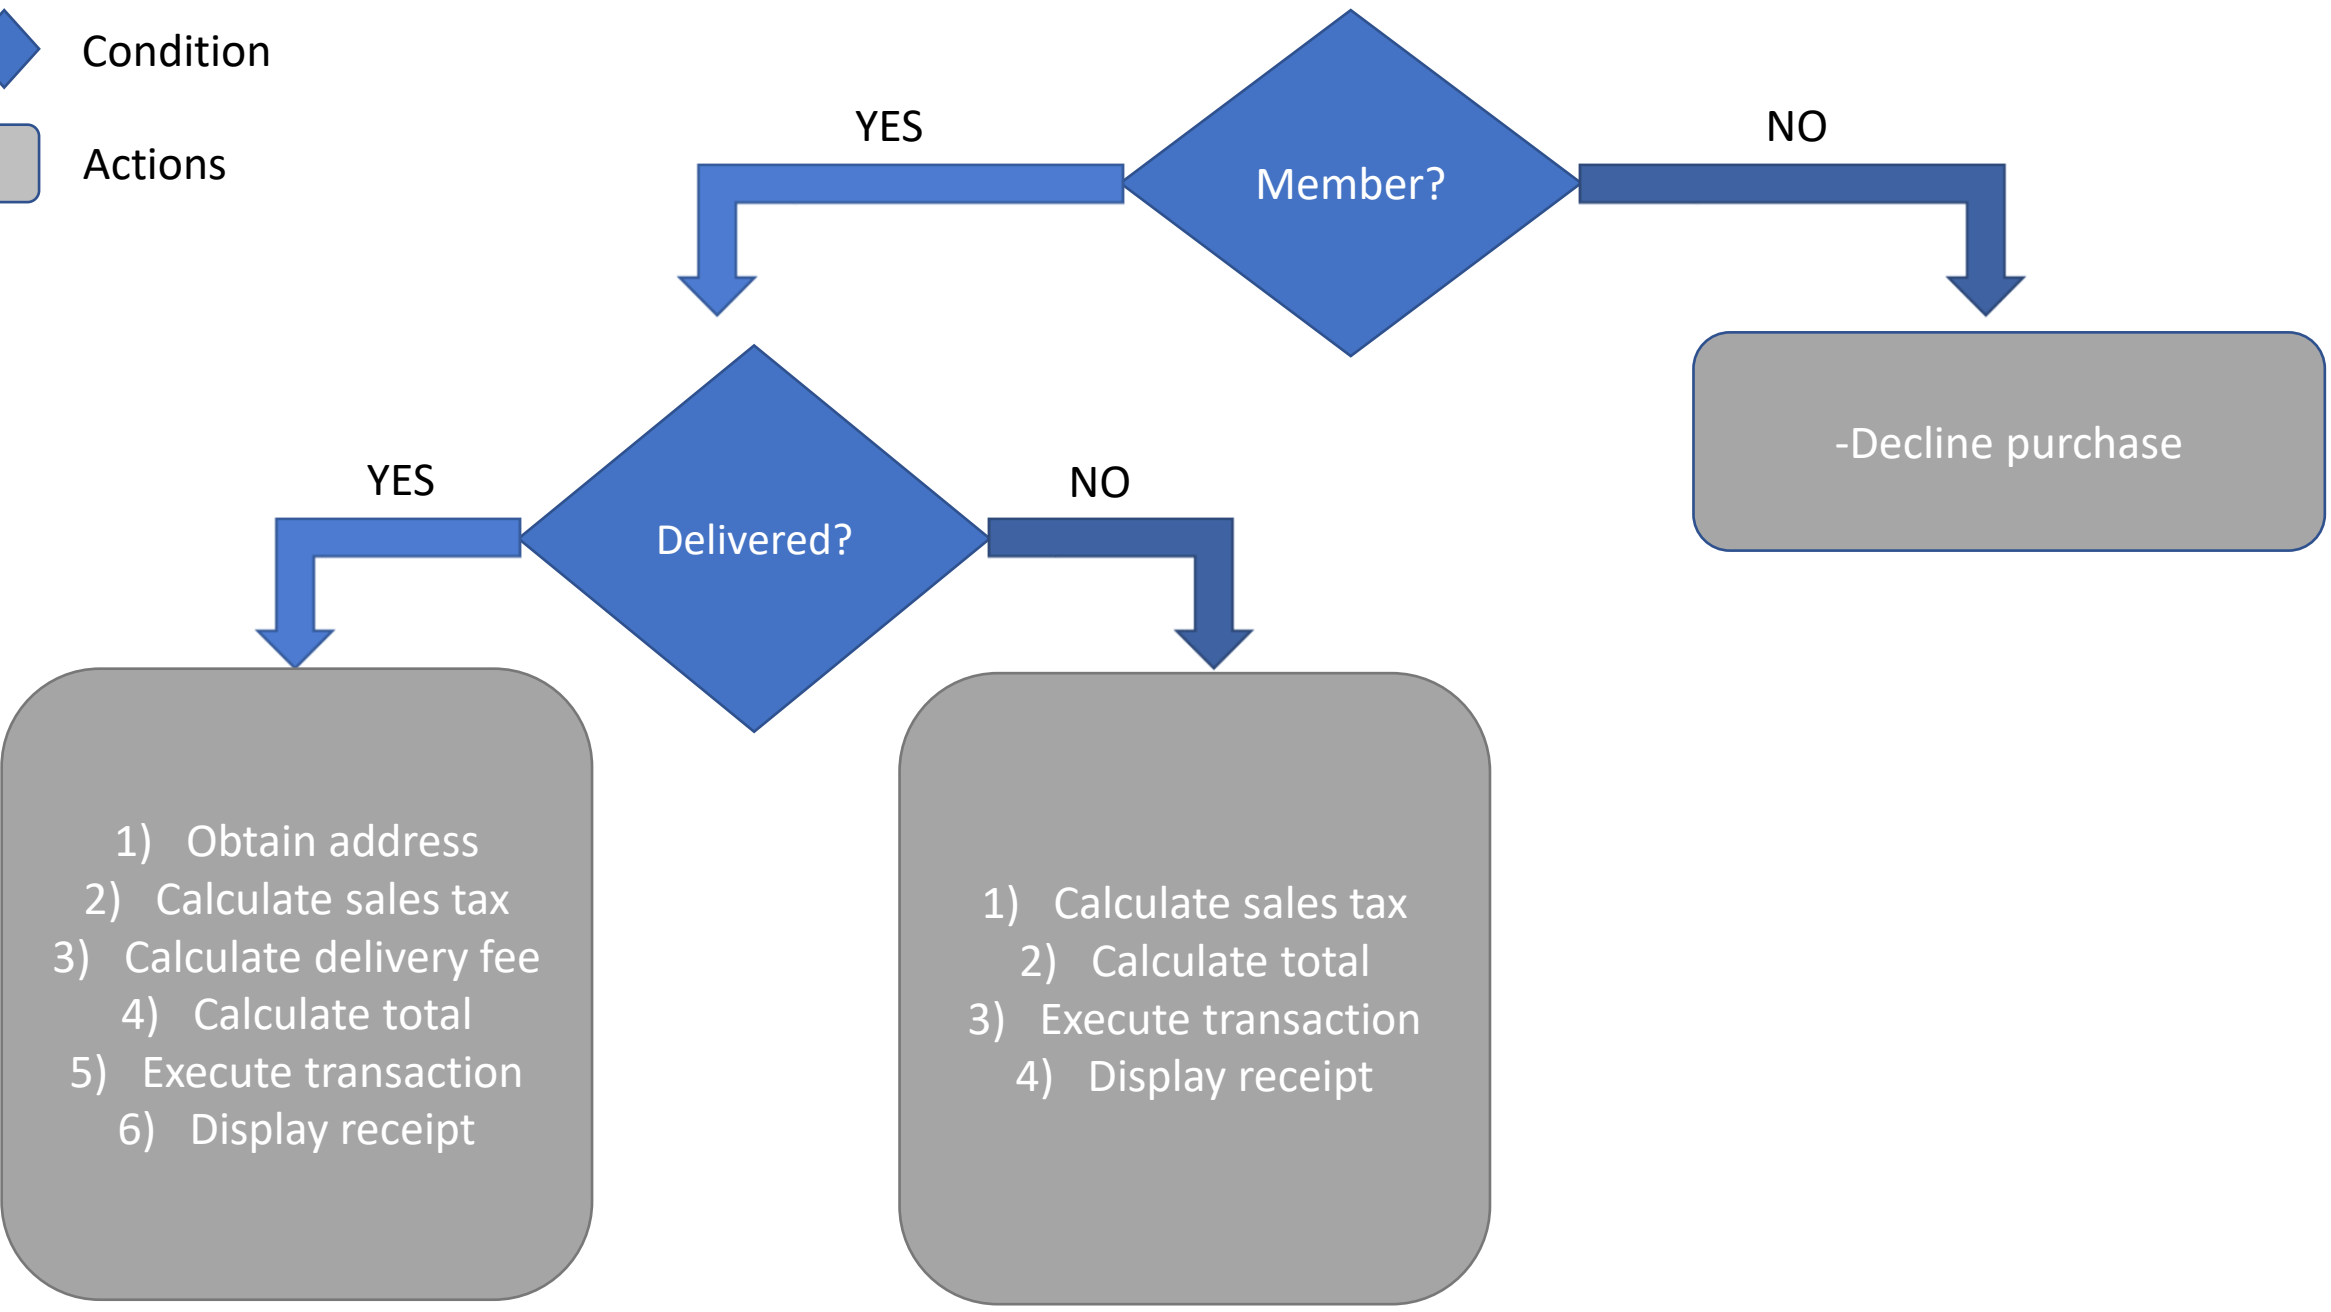

If & **if-else** statements

Condition

Actions

If(member == true):

if(delivered == true):

- Obtain address
- Calculate sales tax
- Calculate delivery fee
- Calculate total
- Execute transaction
- Display receipt

Else:

- Calculate sales tax
- Calculate delivery fee
- Calculate total
- Execute transaction
- Display receipt

Else:

Decline purchase

Loops

For loop

Grades

78	→	index : 0
96	→	index : 1
92	→	index : 2
84	→	index : 3
89	→	index : 4
70	→	index : 5
.		
.		
.		
97	→	index : 99

```
Total =  
Grades [ 0 ] +  
Grades [ 1 ] +  
Grades [ 2 ] +  
Grades [ 3 ] +  
Grades [ 4 ] +  
Grades [ 5 ] +  
.  
.  
.  
Grades [ 99 ]  
Average = total/100  
Print(Average)
```

Grades

X	Total
78	78
96	174
92	266
